Radiologic Technology (Degree) Mission Statement

The program provides and maintains a supportive learning environment and curriculum that prepares students for entry-level, diagnostic radiographer positions. The program prepares students to successfully complete the American Registry of Radiologic Technologists (ARRT) Examination and, upon successful completion of this examination, become Registered Technologists in Radiography, RT(R).

Learning Objectives / Instructional Outcomes

Goal 1: Students will competently perform entry-level radiologic procedures.

Students will produce quality diagnostic images.

Students will exercise proper radiation protection.

Students will practice proper patient care.

Goal 2: Students will develop problem solving and critical thinking skills.

Students will be able to modify standard procedures to accommodate patient conditions.

Students will be able to adjust radiographic factors to produce optimal quality images.

Goal 3: Students will apply effective communication skills.

Students will communicate effectively with patients.

Students will exercise effective written communication skills.

Goal 4: Students will exhibit professional values.

Students will display professionalism.

Students will demonstrate understanding of ethical behavior.

Career Overview

Radiologic Technologists perform diagnostic imaging examinations on patients. They prepare patients and provide patient education for procedures. Radiologic Technologists operate the equipment to take the images and work with physicians to evaluation and determine if additional images are needed. Some technicians may prepare and administer nonradioactive materials for diagnostic procedures or assist in other specialized areas of radiology.

In order to graduate from the Radiologic Technology (Degree) program, students must successfully complete the following curriculum:
